LANCOM OAP-821 Quick Reference Guide

Screw the connector flange (2) to the back of the housing with the four screws and their washers.

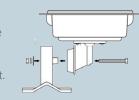

Wall mounting

Use the mounting arm (1) as Place the clamp profile a template. Fix the mounting around the pole. Screw arm to the wall with the supplied screws and dowling plugs.

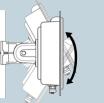

the clamp profile onto the mounting arm with the supplied screws.

Pole mounting

Attach the access point with the connector flange (2) to the mounting arm (1). Use the M8 x 110 bolt with spring locking washer, washer and nut.

The main beam direction of the integrated antenna can be adjusted by tilting the access point up or down by rotating the connection flange about the mounting arm.

Installing access points and/or external antennas without adequate lightning protection can lead to serious damage to the devices and/or to the related network infrastructure. Screw one end of the green grounding wire to the housing and attach the other end to a suitable ground.

Antennas

For 2.4 GHz wireless links, screw the supplied dipole dual-band antennas (not included with the Bridge Kit) to the two N connectors on the underside of the device. Antennas are only to be atdevice is switched off. Mounting or demounting antennas while the device switched on OAP-821 Bridge-Kit). may cause the destruction of

Package content LANCOM OAP-821			
Cable	Waterproof, UV resistant Ethernet PoE cable, screw connector at one end, 15 m		
Documentation	Quick Reference Guide (DE/EN), Installation Guide (DE/EN)		
Antennas	Two 3 dBi dipole dual band antennas		
Power adapter	PoE injector for power supply via Power over Ethernet		
Mounting kit	Equipment for wall and pole mounting, screws included		
Surge arrestor	Not included. AirLancer SN-LAN optionally available (item no. 61261)		
Covering cap	Ensures that the unit remains sealed in case an Ethernet port is unused		
Grounding cable	To avoid electrostatic charge		

of the EU declaration of conformity is available at the following internet address: www.lancom-systems.com/ce/

Via Power over Ethernet, compliant to IEEE 802.3af / IEEE 802.3at

Dimensions 255 mm x 250 mm x 80 mm (length/width/depth)

Weighs ca. 2.8 kg incl. the full pole-mounting equipment

3 LEDs for Power, Ethernet and WLAN

Robust metal housing, protection class IP66 for wall and pole mounting.

Note: For installations in salt-water environments, use a suitable protective housing

Maximum of 11 watts, measured on the PoE injector

-33° C to +70° C

Package content LANCOM OAP-821 Bridge Kit				
Cable	Per LANCOM OAP-821 one waterproof, UV resistant Ethernet PoE cable, screw connector at one end, 15 \mbox{m}			
Documentation	Quick Reference Guide (DE/EN), Installation Guide (DE/EN)			
Antennas	-			
Power adapter	Per LANCOM OAP-821 one PoE injector for power supply via Power over Ethernet			
Mounting kit	Equipment for wall and pole mounting, screws included			
Surge arrestor	Per LANCOM OAP-821 one AirLancer Extender SN-LAN			
Covering cap Ensures that the unit remains sealed in case an Ethernet port is unused				

This product contains separate open-source software components which are subject to their own licenses, in particular the General Public License (GPL). The license information for the device firmware (LCOS) is available on the device's WEBconfig interface under "Extras > License information". If the respective license demands, the source files for the corresponding software components will be made available on a download server upon request.

To avoid electrostatic charge

the Wi-Fi module!

The housing of the device may become warm during opera If the device is operated with outside temperatures exceed 60 °C, it should be mounted with protection against contact

A LAN-side surge arrestor AirLancer SN-LAN is an essential requirement for outdoor installations. It is shipped as a standard componen of the LANCOM OAP-821 Bridge Kit.
