

Managed 26-port Gigabit Ethernet switch for reliable networks

The LANCOM GS-2326+ is a reliable component for modern network infrastructures for any industry or application. It networks up to 26 devices with its 24 Gigabit Ethernet ports and 2 combo ports (Ethernet or fiber-optic). Equipped with numerous security features and a high-performance hardware platform, it is ideal for the secure and reliable networking of medium-sized networks.

- → 24 Gigabit Ethernet and 2 combo ports (TP/SFP)
- → Security with configurable access control on all ports based on IEEE 802.1X
- → Secure remote management through TACACS+, SSH, SSL, and SNMPv3
- → Convenient integration into LANCOM monitoring systems
- → IPv6 and IPv4 support for modern enterprise networks
- → 5-year warranty on all components

#### High power output on 26 ports

The LANCOM GS-2326+ is equipped with 24 Gigabit Ethernet ports and 2 combo ports (Ethernet or fiber-optic). With a data throughput of 52 Gbps on the backplane, it offers full performance even under load. This makes the switch a high-performance basis for modern network infrastructures in any industry or field of application.

#### Configurable access control

The LANCOM GS-2326+ excludes rogue clients from gaining unauthorized access to the network. This is ensured by secured access control on all ports as per IEEE 802.1X (port-based, single, multi, and MAC-based).

#### Secure remote management

Secure communication protocols such as SSH, SSL and SNMPv3 mean that the LANCOM GS-2326+ is ideal for professional remote network management. The switch also supports the TACACS+ protocol for authentication, authorization, and accounting. This optimized solution promises maximum security for multi-site network management and monitoring.

#### **Integration into LANCOM monitoring systems**

The LANCOM GS-2326+ integrates seamlessly into existing LANCOM network infrastructures. Network events are easy to monitor with the LANCOM monitoring systems LANCOM Large Scale Monitor and LANmonitor.

#### IPv6 and IPv4 support

Thanks to the dual-stack implementation, the LANCOM GS-2326+ operates in pure IPv4, pure IPv6, or in mixed networks. Applications such as SSL, SSH, Telnet, and TFTP can continue to be operated on IPv6 networks. Supported IPv6 features include stateless auto-configuration, the discovery of neighboring devices, and MLD snooping.

#### Zero-touch deployment

Quick and easy network integration of the switch as well as automatic assignment of the configuration—without manual configuration. For installations based on the LANCOM Management Cloud, switch receives the correct configuration immediately after network authentication.

Security		
Secure Shell Protocol (SSH)	SSH for a secure remote configuration	
Secure Sockets Layer (SSL)	SSL to encrypt HTTP connections; advanced security for browser-based configuration via web interface	
IEEE 802.1X	IEEE 802.1X access control on all ports; RADIUS for authentication, authorization and accounting with e.g. MD5 hashing; guest VLAN; dynamic VLAN assignment	
Private VLAN edge	Layer 2 isolation between clients in the same VLAN ("protected ports"); support multiple uplinks	
Port security	Locking of MAC addresses to ports; limiting of the number of learned MAC addresses	
IP source guard	Blocking access for illegal IP addresses on specific ports	
Access control lists	Drop or rate limitation of connections based on source and destination MAC addresses, VLAN ID, IP address (IPv4/IPv6), protocol, port, DSCP/IP precedence, TCP/UDP source and destination ports, IEEE 802.1p priority, ICMF packets, IGMP packets, TCP flag	
RADIUS/TACACS+	Authentication, authorization and accounting of configuration changes by RADIUS or TACACS+	
Storm Control	Multicast/Broadcast/Unicast storm suppression	
Isolated Group	Allows certain ports to be designated as protected. All other ports are non-isolated. Traffic between isolated group members is blocked. Traffic can only be sent from isolated group to non-isolated group.	
Performance		
Switching technology	Store and forward with latency less than 4 microseconds	
MAC addresses	Support of max 8K MAC addresses	
Throughput	Max. 52 Gbps on the backplane	
Maximum packet processing	38.69 million packets per second (mpps) at 64-byte packets	
Single IP Management (SIP)	Supports stacking of up to 16 devices, several switches can be managed via one ip address	
VLAN	Port based and IEEE 802.1q tag based VLAN with up to 4,093 VLAN; Supports ingress and egress packet filter in port based VLAN	
Jumbo frame support	Jumbo frame support with up to 9k frames	
Energy efficiency (Green Eth	nernet)	
Energy detection	Energy efficiency according to IEEE 802.3az. Automatically turns off power on Gigabit Ethernet RJ-45 port when detecting link down or Idle of client. Active mode is resumed without loss of any packets when the switch detects the link up	
Cable length detection	Adjusts the signal strength based on the cable length. Reduces the power consumption for short cable	

Layer 2 switching	
Spanning Tree Protokoll (STP) / Rapid STP / Multiple STP	Standard Spanning Tree according to IEEE 802.1d with fast convergence support of IEEE 802.1w (RSTP); using Multiple Spanning Tree instances by default according to IEEE 802.1s (MSTP)
Link Aggregation Control Protocol (LACP)	Support of 13 groups containing up to 16 ports each according to IEEE 802.1ax
VLAN	Support for up to 4K VLANs simultaneously (out of 4096 VLAN lds); matching due to port, IEEE 802.1q tagged VLANs or MAC adresses
Voice VLAN	Voice traffic is automatically assigned to a voice-specific VLAN and treated with appropriate levels of QoS
IGMP multicasts	IGMP v1, v2, v3 to limit bandwidth-intensive multicast traffic to ports with requesters; supports 256 multicast groups, source-specific multicasting
IGMP querier	Support of multicast domains of snooping switches in the absence of a multicast router
IGMP proxy	IGMP proxy to pass IGMP messages through
Generic VLAN registration	VLAN registration with GVRP according to IEEE 802.1q for automatic delivery of VLANs in bridged domains
DHCP Relay Agent	Relay of DHCP broadcast request to different LANs
Supported DHCP options	<ul> <li>→ DHCP option 66</li> <li>→ DHCP option 67</li> <li>→ DHCP option 82</li> </ul>
Interfaces	
Ethernet	<ul> <li>→ 24 TP ports 10/100/1000 Mbps</li> <li>→ 2 combo ports (TP/SFP) with 100/1000 Mbps (SFP) and 10/100/1000 Mbps (TP)</li> <li>→ 26 concurrent Ethernet ports in total</li> </ul>
Console port	RJ45 configuration port for command line access
Management and monitoring	
Management	LANconfig, WEBconfig, LANCOM Management Cloud, Industry Standard CLI
Command Line Interface (CLI)	Configuration and status display from the command line with console application and direct connection to console port, via Telnet or SSH
Monitoring	LANmonitor, LANCOM Management Cloud
Remote Monitoring	Integrated RMON software agent supports 4 RMON groups (history, statistics, alarms and events) for enhanced traffic management, monitoring and analysis
Easy-Configuration-Ports	Easy setup of ports for QoS and Security based on pre-defined configuration profiles

Management and monitoring	
Port Mirroring	Traffic can be mirrored from on port to another for investigation with network analyzer or RMON probe. Up to 25 ports can be mirrored to a single mirror port. Single sessions can be selected
Security	Access rights (read/write) can be set up separately, access control list
SNMP	SNMP management via SNMPv1, v2c or v3 with support of traps. User-based security model for SNMPv3 (USM)
Diagnosis	Diagnosis from the switch with PING and cable diagnosis
Firmware update	<ul> <li>→ Update via WEBconfig and browser (HTTP/HTTPS)</li> <li>→ Update via TFTP and LANconfig</li> <li>→ Dual firmware image to update during operation</li> </ul>
Secure Copy	Securely import and export files
DHCP client	Automatic assignement of the management IP address by DHCP
SNTP	Automatic time settings with Simple Network Time Protocol (SNTP)
s-flow	Standard for monitoring of high-speed-networks. Visualization of network use, accounting an analysation to protect your network against dangers
Hardware	
Weight	5,50 lbs (2,50 kg)
Power supply	Internal power supply unit (100 – 240 V, 50 – 60 Hz)
Environment	Temperature range 0 – 40° C; humidity 10 – 90%; non-condensing
Housing	Robust metal housing, 19" 1U (442 x 44 x 170,3 mm > W x H x D) with removable mounting brackets, network connectors on the front
Fans	None; fanless design without rotating parts, high MTBF
Power consumption (max)	26 W
Software	
LCOS version	based on LCOS SX 3.34
Lifecycle Management	After discontinuation (End of Sale), the device is subject to the LANCOM Lifecycle Management. Details can be found at: <a href="https://www.lancom.de/lifecycle">www.lancom.de/lifecycle</a>
Anti-backdoor policy	Products from LANCOM are free of hidden access paths (backdoors) and other undesirable features for introducing, extracting or manipulating data. The trust seal "IT Security made in Germany" (ITSMIG) and certification by the German Federal Office for Information Security (BSI) confirm the trustworthiness and the outstanding level of security
